		2004	171.9	1,216.7

Note: Data for 2004 through 2008 are estimates of the total U.S. value of shipments of paint, varnish, and lacquer. These estimates were developed by increasing the product class totals shown in Table 2 by adjustment factors.

These factors are: 1.012 for "Architectural coatings", 1.002 for "Product coatings OEM", 1.013 for "Special purpose coatings", and 1.024 for "Miscellaneous paint products."

These factors are used because the annual survey panel was selected to measure approximately 95 percent of the total shipments in the paint industry (NAICS 325510 former SIC 2851). The adjustment factors (based on the 2007 Economic Census - Manufacturing relationships) bring each product class value up to 100 percent. Quarterly data for 2008 and 2007 reflect the adjusted totals in Table 1 and are shown in Table 3 along with the quarterly data originally published in the Current Industrial Reports quarterly series MQ325F (MQ28F), Paint, Varnish, and Lacquer.

HISTORICAL NOTE

The Census Bureau has collected data on paint, varnish, and lacquer since 1928. Prior to 1981, a monthly sample survey, benchmarked to the census of manufactures, was used to collect these data. Beginning with data year 1981, an annual survey on paint and related products was added. The monthly survey was still conducted through 1990. Beginning in 1991, due to budget reductions, the monthly series was canceled and replaced with a similar quarterly series.

Historical Current Industrial Reports data (called Facts for Industry before 1959) may be obtained from a Federal Depository Library. To locate a Federal Depository Library in your area, please visit <http://www.gpoaccess.gov/libraries.html>.
